Poderes – O Console Administrativo

#volta_varela

Poderes – Do SQL ao Endpoint

The screenshot displays the Visual Studio interface with two main panels. The left panel, titled 'Object Inspector', shows the configuration for the `dsResPalestrantes` resource, which is a `TEMSDataSetResource`. The 'Properties' tab is active, showing the 'AllowedActions' property set to `Get,Post,Put,Delete`. Below this, a list of actions (List, Get, Post, Put, Delete) is shown, each with a checked checkbox and the value 'True'. The 'DataSet' property is set to `PalestrantesTable`. The right panel, titled 'Solution Explorer', shows the project structure with three items: `ECon2025Connection`, `PalestrantesTable`, and `dsResPalestrantes`.

Property	Value
AllowedActions	Get,Post,Put,Delete
List	True
Get	True
Post	True
Put	True
Delete	True
DataSet	PalestrantesTable

#volta_varela

Novos Poderes: Versionamento de API

```
[ResourceVersion('v1', TEMSVersionStatus.Deprecated)]  
[ResourceName('web')]  
TEConference2024 = class(TObject) ...
```

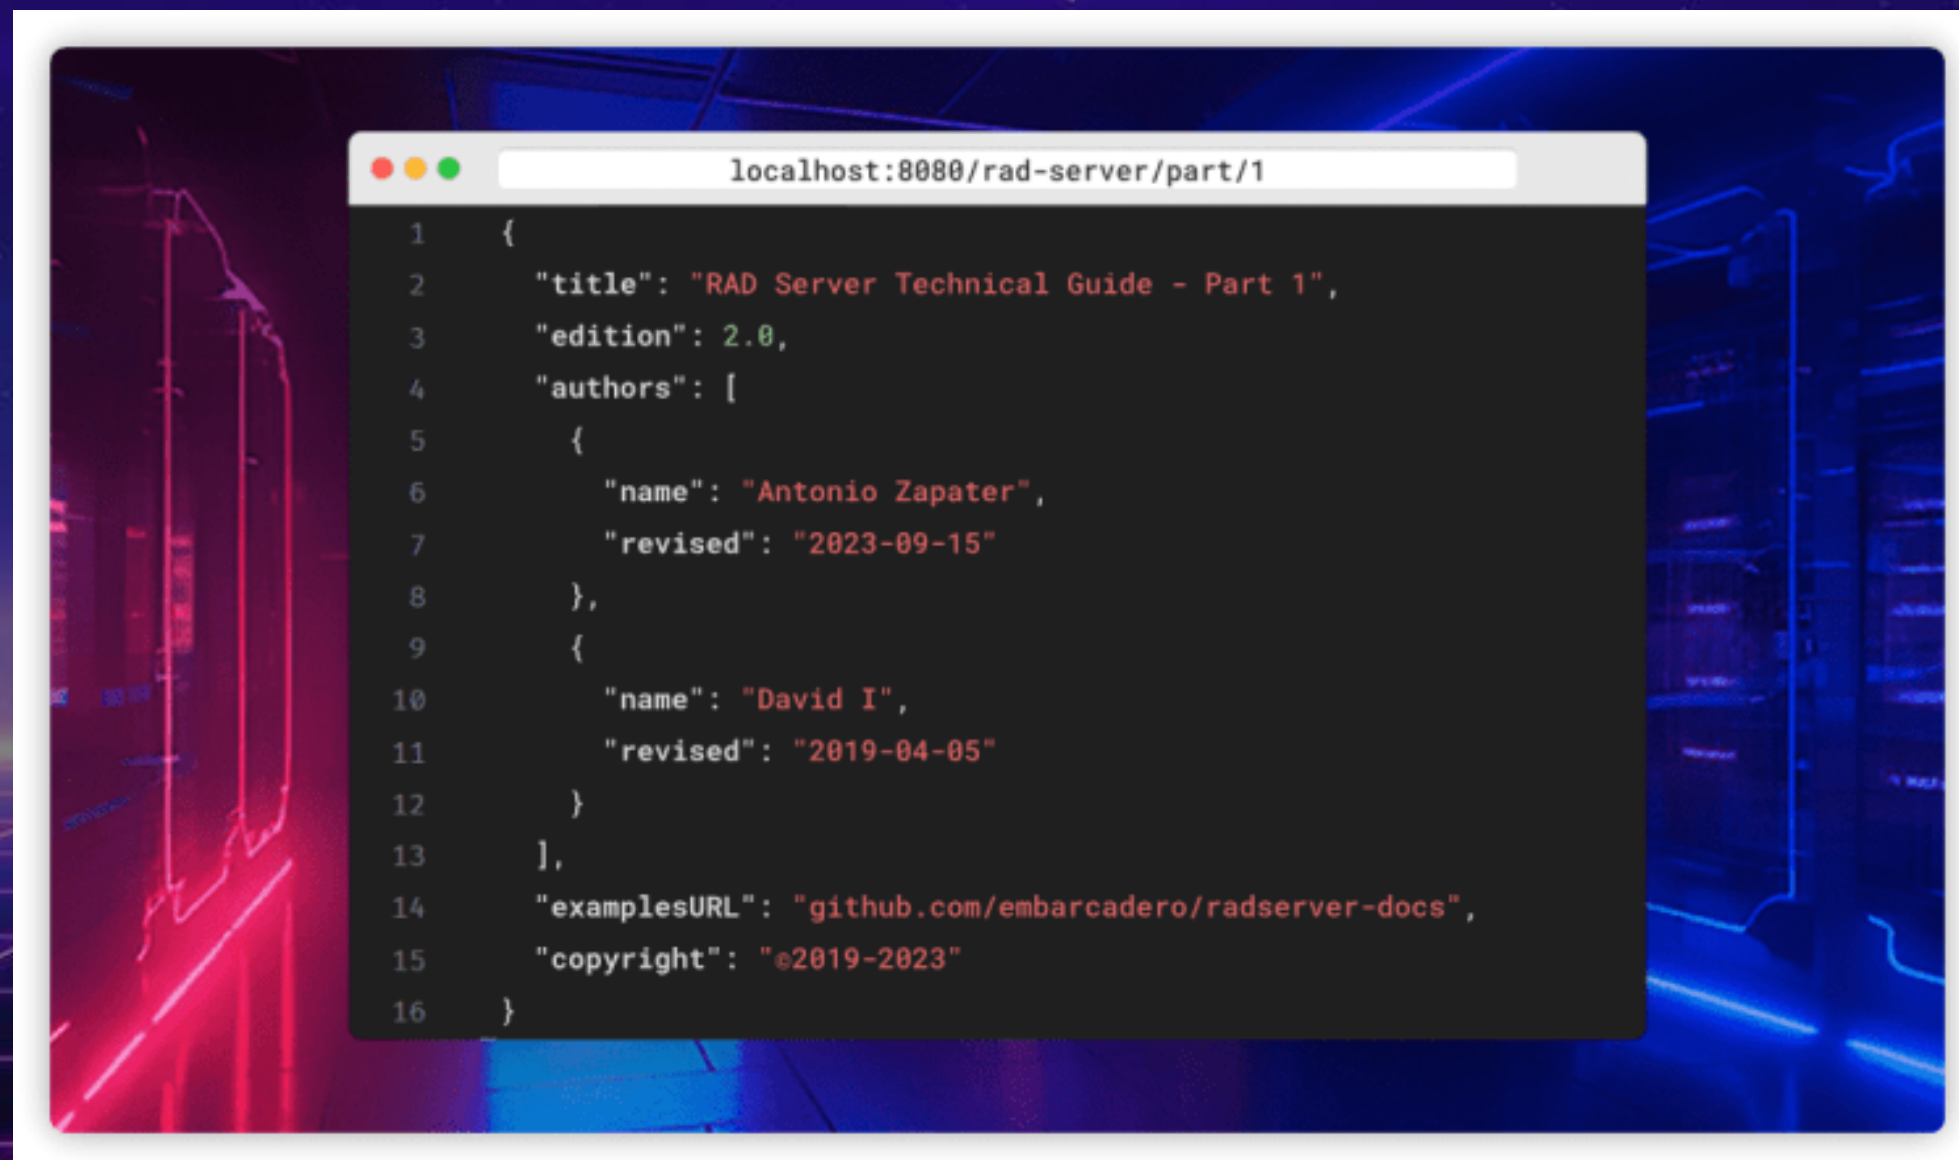

```
[ResourceVersion('v2', TEMSVersionStatus.Default)]  
[ResourceName('web')]  
TEConference2025 = class(TDataModule) ...
```

Aventura: RAD Server + WebStencils
